

Underground Service Process

Underground Process

- 1) Call Customer Service to setup account.
- 2) If not in an established underground subdivision, please contact engineering
- 3) Engineer will notify customer of options and pricing. Payment must be made before job will be scheduled to be worked.
- 4) If customer chooses to install conduit, they must contact engineer for inspection. Engineer will contact customer when inspection is complete.
- 5) Job will be scheduled
